

## New! ECO-Chimney Cap Ø 80 and Ø 500

No other product covers the range from Ø 80 to Ø 500 mm. Thanks to the latest pressure forming technology, it has the decisive advantage that the louvers are made from whole pieces. This means there are no weld seams or adhesives on the product that could deteriorate over time and require maintenance.

Chimney Cap

### Technical Data

Nominal diameter	A	B	C	Louvres
80	76	190	230	4
100	96	210	230	4
125	121	235	230	4
150	146	260	230	4
175	176	285	230	4
200	196	310	230	4
225	220	335	230	4
250	246	360	290	5
300	296	410	290	5
350	346	460	290	5
400	396	510	290	5
450	446	560	350	6
500	496	610	350	6

The **ECO-Chimney Cap** achieves an unparalleled suction effect thanks to the perfect coordination of the individual louvers, protecting the chimney opening from rain, snow, and ice. The professional tradesman requires no additional accessories for installation – the **ECO-Chimney Cap** simply needs to be placed on top, and the chimney system is perfect.
